

## AP Statistics Summer Homework for 2022 – 2023 School Year

### Required Materials

Students should have a TI-84 or TI-Nspire calculator and 3-ring binder exclusively reserved for this class. Students will also be required to have a copy of our textbook:

The Practice of Statistics, 5<sup>th</sup> edition      ISBN # 1-4641-08873-0

You may also rent a textbook using [knetbooks.com](http://knetbooks.com). There's also a PDF version of the textbook on the internet – it is a lot of scrolling! I will also have a list available of students who want to resell their textbook if you would like a hard copy. You must have the book in your possession on the first day of class.

### Summer Assignments

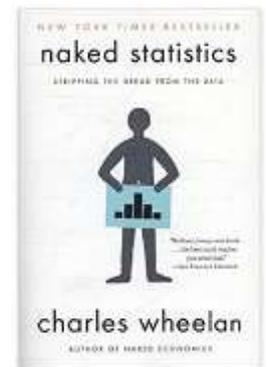

First things first – join the AP Statistics Summer 2022 Google Classroom: **jch5diu**

Secondly, join my REMIND. Link under Classwork on Google Classroom.

There's both an extra credit opportunity and notes to complete for the first day of school.

In addition to these assignments, students are required to read Naked Statistics: Stripping the Dread from the Data by Charles Wheelan.

It is my hope that this book (yes, the whole book) will give you a better background of what statistics is and how it will impact the rest of your life. You may purchase a copy, check it out from the library, download it on a smart device – the choice is yours!

We will have a quiz over the summer reading assignment on the first day of class. The quiz will be two parts – a multiple choice part and a free response part. It is recommended that you take notes as you read **since you will be allowed to use them for the quiz**. Look for important vocabulary and application of such vocabulary.

If you have any questions, please don't hesitate to email me at [aglerup@lps.k12.co.us](mailto:aglerup@lps.k12.co.us). Have fun and I look forward to seeing you in August!
