

Help your employees stay healthy

Today more than ever, it's vital to avoid spreading viruses. Kaiser Permanente can help your employees take an important first step.

4 reasons to get a flu shot

It's the best defense

Flu shots prevented 4.4 million cases and 58,000 hospital visits from 2018 to 2019.¹

It's safe

Flu shots can't—and won't—give you the flu. Millions of Americans have received them safely over the last 50 years.²

It protects others

Preventing flu symptoms like coughing and sneezing will help stop the spread to family, friends, and co-workers.

It changes every year

The vaccine is updated each year to target the latest strains of the virus.
