

6

SAFE WORK PRACTICES

- 1** Pay attention. Stay alert to the possible hazards in your work environment so that you can take steps to correct or guard against them.
- 2** Concentrate on the task at hand. Distractions, boredom or fatigue can lead to accidents and other safety hazards. Take good care of yourself.
- 3** Have the strength to do the right thing even when it's easier not to. Follow safety procedures. Remind co-workers of safety precautions. Follow district policy at all times.
- 4** Take the time to do things correctly every time. Be aware of your surroundings. Take a moment to assess the setting. There are no shortcuts to safety!
- 5** Take responsibility for a safe work environment. If you see something out of place, pick it up or alert someone who can help. Don't assume that someone else will take action – let it be you!
- 6** Stop to think before you act. Be smart and avoid taking unnecessary risks. Take the time to thoughtfully ensure that objects are safely in their place, and conditions are favorable for your activity before you begin.

Think Safety & Work Safely!
