

About

EUREKA!

The Girls Inc. Eureka! program is an intensive, five-year STEM-based program that builds girls' confidence and skills through hands-on opportunities in science, technology, engineering, and math. Utilizing a "whole girl" approach, the program also includes sports and physical fitness, personal development, and college and career readiness.

Serving girls from across the Denver Metro area, Eureka! broadens girls' future academic and career interests, encourages enrollment in advanced math and science courses, promotes positive risk-taking, and assists girls in developing networks of peers and mentors to support their future endeavors.

During Eureka! girls gain first-hand knowledge through a variety of exciting and compelling activities that explore the cutting edge world of STEM, including: designing model buildings, exploring different forms of energy, and using computer programming to create interactive video games.

With complementary activities in healthy living, social justice, and financial literacy, Eureka's approach fosters educational, professional, and personal development.
